- Please install proper power switch, fuse and power leakage protector near the equipment.
- The voltage supplied must be consistent with the information in the parameter part above.
- This equipment is connected with fixed wiring, according to the wiring rules and it is equipped with all extremely disconnect switch.
- Repairs should only be performed by qualified technicians to ensure safety. Repairs and other work by unqualified persons could be dangerous. Remove switch components, and the power cord (internal line), the light bulb unit etc, must first stop using;

laypeople may not arbitrarily dismantle and modification.

3. Operation Instruction

3.1 Connect the power supply and green power indication lamp will be on.

3.2 Clock-wisely turn the knob to control the griddle temperature. Please turn the knob to the temperature you need and the yellow heating indication lamp will be on. The heating element is working. When the temperature is reached what we need, then the thermostat will automatically disconnect the heating element, and the yellow lamp will be off. The heating element will stop working. When the temperature is lower than what we need, the thermostat will automatically connect the heating element and it will restart to work again and the yellow heating indication light will be on. Again and again, the griddle will keep in a certain temperature.

3.3 After use, please turn off the switch and disconnect the power.

3.4 Please do not touch the griddle and product surface during usage.

3.5 Please do not use corrosive water or detergent to clean the equipment.
