|---------------------------------|---------------------------------|
| 1. Lifting assembly part        | 29. Diamond shaped seat         |
| 2. Lifting plate                | 30. Alloy high-elastic coupling |
| 3. Nylon circular pipe          | 31. Copper nut                  |
| 4. Back box                     | 32. Screw shaft                 |
| 5. Back box sticker             | 33. Copper sleeve bearing       |
| 6. Back of the Back box         | 34. Power panel                 |
| 7. Back plate                   | 35. Control plastic box         |
| 8. Tank                         | 36. Control box fastener        |
| 9. Through-hole protection pad  | 37. Lifting motor               |
| 10. Lid                         | 38. 600mm protection wire       |
| 11. Handle                      | 39. 800mm protection wire       |
| 12. Fry basket                  | 40. Magnet switch               |
| 13. Oil temperature sensor      | 41. Magnet                      |
| 14. Control panel               | 42. Connect wire                |
| 15. Control panel supporter     | 43. Heating coil ceramic glass  |
| 16. Control box                 | 44. Heating coil                |
| 17. Control panel glass         | 45. Spring                      |
| 18. Liquid expansion thermostat | 46. Heating coil sensor         |
| 19. Tap with cover              | 47. Main board                  |
| 20. Stainless steel body        | 48. Magnet ring                 |
| 21. Solid pipe                  | 49. Inner plastic case          |
| 22. Pipe supporter              | 50. T-shaped locker             |
| 23. PCB FR-4                    | 51. Power cord                  |
| 24. Limit plate                 | 52. Bottom plate                |
| 25. Pipe fixed plate            | 53. Feet                        |
| 26. Motor holder 1              | 54. Fan                         |
| 27. Motor holder 2              | 55. Filter                      |
| 28. Motor fixed plate           |                                 |
